

WINGMASTER

Complete
windfarm analysis
in one app

WINGMASTER. THE NEW APP FOR OPERATORS.

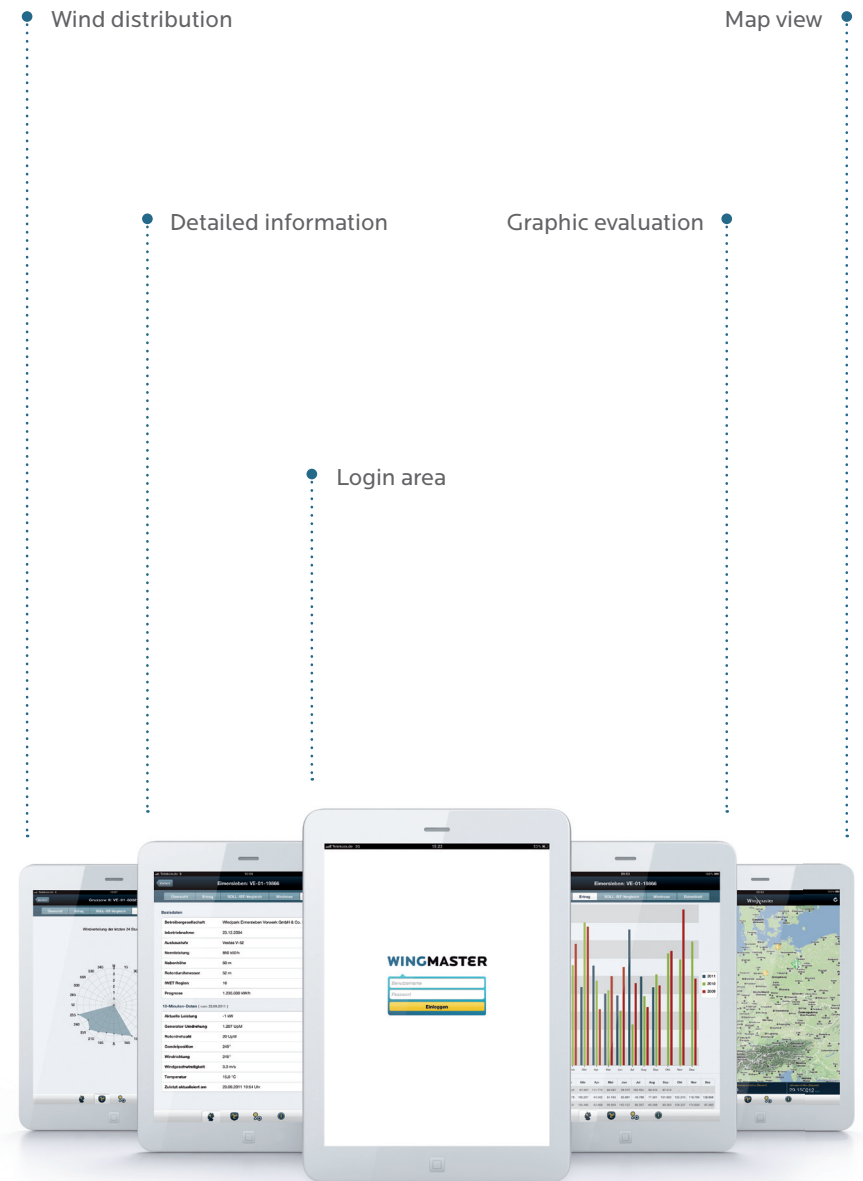

Automated data collection,
worldwide accessibility,
analysis regardless of manufacturer.

He's a visionary. He's a pioneer. He's new.

WINGMASTER is the first application in the world that manages to compress a full windfarm analysis station into just one app.

The software was designed especially for operators and pushes all current performance data, efficiency comparisons and wind speeds for a windfarm in real time to your tablet.

Data is presented in diagram form on a dynamic dashboard, always ready for crucial moments in your everyday business.

ORDERING WINGMASTER

As a young wind energy service provider, NOTUS operations aimed to design an app that would professionally prepare and mobilise all the data for a windfarm – and we created **WINGMASTER**.

And even if you aren't one of our customers yet: As soon as your windfarm is set up in our software, it's ready to go.
